*Cost per inch/foot is not guaranteed. Based on using water on all cuts. Speed of cut not calculated into Inch/Feet cost but must be considered in overall cost per foot when cutting. For example, the HI5 cuts 3-4 X faster than the VH5 meaning labor cost are greatly reduced as well as saw operating times.

** All Material Blades: The Vari-Cut Plus blade utilizes a separate Asphalt Segment with undercut protection and is a better choice when needing a blade to cut a 50/50 mix of Asphalt and Concrete.
